

# Solenoid valve injector for common-rail systems

Precision fuel injection for high performance

## Modular design for numerous applications

Solenoid valve injector CRI2-25

Solenoid valve injector CRI2-25 with Needle Closing Control

up to

# 2,500 bar

pressure for high engine performance

# Lower consumption

and reduced emissions are made possible through short injection intervals.

- ▶ The solenoid valve injectors allow up to ten individual injections per injection cycle for quiet and efficient combustion.
- ▶ The Bosch technology is proven millions of times over.
- ▶ The injectors are compatible across all pressure levels and enable a flexible rate shaping.
- ▶ Thanks to a robust design the injectors are suitable for selected and standardized country-specific fuel qualities.
